STONEWALLS

DRY-STONE WALLS FOR CLIMATE CHANGE ADAPTATION

Database of target groups and stakeholders

Parco Nazionale delle Cinque Terre, ITRB, Fondazione Manarola, DIBAR, Legambiente, DISTAV

Date:	31.01.2020
Author:	PN5T, LEGAMB, ITRB, DISTAV; DIBAR, FM
Approved by:	Rocco Lagioia
Deliverable ID:	A3.1

1)   Deliverable description

This document provides details on the database presented in a separate annex in excel format.

The database is presented in one single file with 4 excel sheets, dividing the identified stakeholders as follows:

- Sheet 1, STK P5T: list of local and international partners based on the work carried out by all the partners coordinated by Legambiente, divided into 4 categories:
  2) Voluntary associations, foundations, networks
  3) Farms, tourism-hospitality activities, sectorial associations
  4) Universities, scientific networks, museums, study centers, schools
  5) Local administrations and public bodies.

  For each stakeholder, the country, contact person, website, email, telephone number and address of the organization were indicated.

- Sheet 2, STK CATALUNYA: lists the partners identified in Spain by DIBAR and divided into 8 categories:
  - Associations / Foundations / NGOs
  - Researchers / Historians
  - Productive activities
  - Public administrations, town councils, consortia and county councils
  - Owners' associations
  - Environmental educators
  - Involved in the recognition of dry-stone walls as an intangible cultural heritage of humanity in 2018
 - Other Associations / Foundations

  For each stakeholder the country, contact person, website, email, telephone number, address have been identified.

- Sheet 3, ADVISORY BOARD: lists the member organizations of the Advisory Board that have agreed to be part of it, together with the contact person and email.
- Sheet 4, BENEFICIARIES: lists the organizations that are part of the consortium and the elements that are part of it. For each of them the role, the person who was replaced, the email address and the telephone number have been indicated.

The database, despite having a clear and defined deadline, as a deliverable, will nevertheless be constantly updated until the end of the project and beyond.

For a more effective creation of the stakeholder database, it was preceded by an evaluation and analysis that produced the following graphs relating to the identification of external and internal ones and the level of involvement in the project:
